Visited Dr. Stejneger for an hour or more and discussed the possibility of Cope's Chilomeniscus ephippicus coming from California. Wonderful how the old gentleman (now nearing 91) remembers all the notes and lines of investigation. I asked him particularly about the Baird and Girard ms. to accompany the Pacific RR reports, but he didn't know where it could be.

Went to the U.S. Nat. Gallery of Art for lunch. Waited a long time for a chance to eat.

Worked most of the day on T-L correlations and determining what data I should get in the north. Held up somewhat awaiting northern data - there being no use completing calculations until all available. So started the tabulations illustrating of the use of the coefficient of divergence in sexual dimorphism. Only fair progress.

A COMPLETE SERVICE FOR YOU

For every kind of business or personal record, there is a kind of equipment that is especially suited. And it is the business of the modern stationer to help you select the right equipment for the job.

He knows the advantages and limitations of every device in common use. He doesn't pretend to be an expert in business systems. But in all matters pertaining to the selection of records for greatest efficiency, his knowledge and experience will be invaluable to you.

For example ask the stationer to show you these new National features of convenience:

"Eye-Ease" Records	cut glare—lessen eye-strain
Steel Hinge Ring Books	strongest at points of wear
Bi-Lock Post Binders	double lock advantages
Nat-Lock Post Binders	keyless—easy to operate
Stanite Post Binders	no fabric to wear off
Planned Loose Leaf Forms	save time—better control
End-Bound Column Books	save wear, save eyes
Visible Record Equipment	efficient and economical
Machine Posting Equipment	speedy to operate

Other National Items available are—

Appointment Books, Address Books, Telephone Books, Tourist Books,
Scrap Books, and Desk Diaries.
